“Planning for the Future!”

Dear Harvard Extension School Student,

My name is William B. Hall, like you, I’m a student at Harvard Extension School (HES) with similar challenges and dreams. I’m pursuing a Master of Liberal Arts in Management (ALMM). I’m currently a nominated candidate for President of the Harvard Extension Student Association (HESA). My desire is to serve as your next President and I encourage you to join me in making your education at HES more valuable and a super fun experience!

VISION:

My Vision includes “Planning for the Future” by implementing, with your help, the following items:

Student Pride & Communication: I have done extensive research and will commission a team of students to draft a position paper that clarifies the facts about HES students and their world-class education. Additionally, all materials produced by HESA will be branded to express the distinct spirit and pride of HES students. I have a proposed budget and funding mechanism to improve our web presence. This will provide better video communication, social networking, and a greater sense of community for our students around the world.

Student Club Funding & Collaboration: I am currently completing a comprehensive corporate sponsorship program that will significantly increase funding for the student organizations by at least $10,000.00 or more. This will help fund our increased web presence and other major events. Student clubs are a priority because they encourage student interaction, networking & involvement.

Student Educational & Social Events: I will schedule events that feature the most interesting and influential speakers in the world. Equally as important, I’ll provide fun social events that you’ll remember for a lifetime! Imagine the music of your favorite band, a mouth watering selection of your favorite food and spirits, all at the beautiful Harvard Club overlooking the twinkling night sky of Boston. I look forward to meeting you there as your new President!

QUALIFICATIONS:

I bring to the student body over 15 years of dynamic leadership experience including the following:

Professionally, I am the former Founder & President of Ohio Institute of Technology. Additionally, I have successfully managed and trained hundreds of employees for Fortune 500 companies such as Nabisco, Kellogg’s, Holiday Inn, Ameritrade, Philip Morris, Goodyear, Coca-Cola and IBM.

Personally, I have served my community as a former member of AmeriCorps working with disadvantaged school children. Additionally, I enjoyed my role as a volunteer with Election Protection supporting equal access to U.S. voting polls in minority communities.

Culturally, being raised in Alaska, near Mt. McKinley, taught me to have a pioneering spirit. I have a love for building great things and I embrace the process as a fun adventure. HESA has been built through the volunteer service and dedication of current and past administrations. In this tradition I offer my leadership experience and pioneering fun spirit to serve the students and clubs of HES.

Together we can do it, I urge you to show your support and spread the word!
